

Total Solutions

Aim:

E Commerce Website for Thing required to be done under one app. My idea is to create a web application on which if someone face any issue, he/she can report there and the things will be done. Idea is somewhat Like urban clap but a little extended

Purpose:

The purpose of this project is to build a site that is easily accessible to all the users who are searching for any person like maid, Carpenter, Plumber even lawyer and doctor

Existing System:

URBAN CLAP, But I want to extend it.

Advantages:

- It saves a lot of time.
- Share Easily
- Easy to use by anyone
- Access to every Person issues

Requirements:

- HTML
- CSS
- JavaScript
- BootStrap
